Primary Math 1B Lesson Plans

Mental Math 16 can be a real challenge for some children. I suggest spending as many days as necessary having your child work on these preliminary steps that will prepare him/her for mental math 16. It would be helpful to use unifix cubes or legos stacked in groups of tens to demonstrate “borrowing” from the tens. (Note: these are not included in the lesson plans. If needed, stop after lesson 61 and spend several days working on these.)
